## Summary

With over 8 years of experience in the software testing industry, I am a seasoned Software Development Engineer in Test (SDET) and Automation Engineer. My expertise spans multiple programming languages and testing frameworks, allowing me to deliver robust, efficient, and scalable solutions.

Core Competencies:

- Programming Languages: Python, JavaScript, TypeScript, Java
- Automation Frameworks: Selenium, Appium, Playwright, Cypress
- CI/CD: Continuous Integration and Continuous Deployment processes to streamline development and release cycles
- Performance Testing: Ensuring applications meet performance standards under various conditions
- Security Testing: Identifying and mitigating vulnerabilities to protect applications from threats
- Manual Testing: Conducting thorough manual tests to ensure software quality and functionality

My approach combines a deep understanding of software development with a passion for quality assurance, enabling me to create comprehensive test plans and automation scripts that enhance the reliability and performance of software applications. I thrive in fast-paced environments and am adept at working collaboratively with cross-functional teams to achieve project goals.

I am always looking for new challenges and opportunities to further my skills and contribute to innovative projects. Let's connect and explore how I can help your organization achieve its software quality and automation goals.
